## **+ Benefits of Solar**

### **Save Money**

Going solar helps reduce your electricity bill, which can save you big bucks as your home derives its power from a source that never goes out. Research shows that your home also becomes more energy-efficient with solar upgrades.

### **Enjoy Convenience**

Upgrading your home to solar makes it much easier to manage your household's lights and appliances — especially when you make it a smart home! We offer a Google Home Mini with every installation.

### **Help the Planet**

As we reduce our dependence on fossil fuels, we minimise our carbon footprints — and that helps build a more sustainable world. Your choice to go solar not only helps you save money and reduce your footprint, but also promotes a better future for our descendants.

## **+ Why Choose Pedleys Solar?**

We offer exceptional service to our clients because we know the importance of good workmanship. With our commitment to high-quality work and the top standards for equipment installation, we ensure lasting results for your home.

We've been performing electrical services for more than forty years, and we've been thrilled to see the rise of solar and how it transforms people's homes for the better. Our team of CEC Accredited electricians is proud to offer optimal service throughout South East Queensland. We look forward to helping you upgrade your home with solar!

## **+ Our Process**

Here's how we work: We take a close look at your home's unique needs, and with our decades of expertise and training, offer a personalised consultation that will maximise your home's energy efficiency. Whether you live in a house, apartment, or condo, we're here to make solar work for you.

1. First, we inspect your roof to determine the precise needs of your home. This helps us plan out the correct equipment and configuration to create an effective solar array.
2. Next, we conduct an electrical demand analysis to see what your energy usage tends to be. We then assess how a solar array will generate sufficient power for your needs.
3. Then, we design a fully customised solar energy system that will provide you with the best energy savings. You'll also receive a detailed quote so that you can make the best decisions for your family's needs.
4. Finally, it's time to install the solar panels! Our team of expert electricians will assemble and configure all components of your system to make it easy to use and guaranteed to last you years.

## **+ Our Guarantee**

There's no need to worry about your solar energy system — Pedleys Solar provides continual support and maintenance to address any performance issues or damage that arises. And because we're committed to your satisfaction, we offer a guarantee that you'll see savings on your first power bill after installation. If you don't, you'll get \$2000 cashback. This is the best time to upgrade your home to solar-powered — no risk, just amazing results!

**We're thrilled to offer this unbeatable offer** to start saving on your power bill and reduce your carbon footprint today. For \$0 upfront, you'll get a 6.6kW Jinko + Sungrow Solar System professionally installed, with a \$2000 cashback guarantee if you don't see solar credits on your first power bill. Plus, your payments won't start

until 30 days after the installation so that you can immediately take advantage of massive energy savings. Book today and get:

- Powerful Solar Array with Guaranteed Energy Savings
- Free Google Home Mini to manage your lights and appliances
- Free Upgrade to Mono Panels
- 25-Year Performance Warranty
- Installation by CEC Accredited Electricians with More than 40 Years' Experience
- Top-Quality Service and Customised Array for Your Unique Energy Needs
- Knowledge that You're Helping Ensure A Better Future for Your Family

## **+ Benefits of Solar**

**Save Money**

An energy-efficient, solar-powered home can save you big bucks as you rely on a source of power that never goes out! Watch your power bill drop and your energy savings rise. Research shows that a solar energy system ends up paying for itself with the money it saves you!

### **Improve Your Home's Value**

Energy-efficient properties have a higher market value, which makes a solar installation an excellent investment in your future. In addition to immediate energy savings, you'll give your home a lasting, durable upgrade that saves you money for years and improves the resell value of your home.

### **Have a Smart Home**

Modern conveniences rely upon efficient, up-to-date systems that are simple to use. That's why we include a Google Home Mini with every installation to help you easily manage your lighting, appliances, and therefore your energy usage, further saving you money.

## **+ Why Choose Pedleys Solar?**

Pedleys Solar is synonymous with exceptional service and workmanship. We're a family-owned business who's been performing electrical services for more than 40 years — and we'd love to continue our streak of excellence by helping you go solar. We're committed to getting you great results and savings with a fully customised solar energy system that suits your unique needs.

Our team includes highly experienced, CEC-Accredited electricians who deliver nothing but excellent work for your South East Queensland home. We offer a personalised approach to secure your sunnier future.

## **+ How We Work**

Our process is specially designed to deliver optimal results. No matter what type of property you have, we'll create the perfect solar energy solution for you. Our extensive expertise and experience with solar installations allow us to provide an array that maximises your savings and is built to last.

1. **Step 1.** We begin with a roof inspection to determine what type of panels you need and how they need to be installed and positioned. We work carefully to ensure that your new equipment will provide you with optimal results.
2. **Step 2.** We then perform an electrical demand analysis that measures your energy usage trends and how we can maximise your savings. This allows us to design a solar array that meets your energy needs
3. **Step 3.** We use our engineering and electrical expertise to thoroughly map out your solar energy system, from the panels to the inverter to your solar

batteries. We'll then provide you with a detailed quote so there are no surprises.

4. **Step 4.** We install the panels and ensure that they'll provide lasting performance and easy maintenance. Our electricians will configure every part of the system so that your home will be fully equipped to take advantage of your new solar panels.

## **+ Our Guarantee**

We stick around to ensure you get results, and we're proud to offer regular maintenance, check-ins, and repairs as part of our performance guarantee. When you work with Pedleys Solar, you can upgrade your home for minimal risk and excellent results. In fact, we're so committed to your satisfaction that we offer a \$2000 cashback guarantee that you'll get solar credits on your first power bill after post-installation. We stand by our work, which is why we're offering an UNBEATABLE offer for your South East Queensland home.

**Ready to start your solar future today?** For a limited time, we're offering our top-quality installations of a 6.6kW Jinko + Sungrow Solar System for \$0 down and zero payments your first 30 days. Plus, we have a \$2000 cashback guarantee that you'll see immediate savings. There's no better time to go solar. Book today and get:

- Powerful Solar Array with Guaranteed Energy Savings
- Free Google Home Mini to manage your lights and appliances
- Free Upgrade to Mono Panels
- 25-Year Performance Warranty
- Installation by CEC Accredited Electricians with More than 40 Years' Experience
- Top-Quality Service and Customised Array for Your Unique Energy Needs
- Knowledge that You're Helping Ensure A Better Future for Your Family
